Problem

- Plans

Solution

I addressed the issue of having multiple plans and the lack of clarity regarding the features of each plan by simplifying it into two plans

Starter Plan: for all new users
- 10 Draft files free

Professional Plan: for subscriber users
- Unlimited Draft files
- Can create teams
- Can share files to community and can sell own projects

Project Description

Our platform is a design and collaboration tool where users can create and manage their own projects. Users have the ability to design their projects, collaborate with their team members, and also sell their creations in the platform's marketplace. This solution provides an integrated environment for project design, team collaboration, and e-commerce, facilitating a seamless experience from creation to commercialization.

+18 Endpoints

- By default starter plan for new user
- Subscribe to Professional plan
- Search projects by type
- rating
- comment
- like
- remove project from saved list
- Follow users
- Unfollow users
- remove project from resource list
